

FOR IMMEDIATE RELEASE

IBSAT, part of BLUETEL WIRELESS, announces agreement as authorized reseller of Amazon Leo to bring high-speed satellite internet to Spain and Portugal.

As an authorized reseller of Amazon Leo, IBSAT will offer low Earth orbit satellite connectivity powered by Amazon Leo to enterprise customers

Madrid, Spain — August 3rd, 2026 — IBSAT, part of BLUETEL WIRELESS, a highly recognized and specialized service provider within the satellite connectivity industry in Spain and Portugal, announced an agreement with Amazon Leo, Amazon's low Earth orbit satellite network. Under the agreement, IBSAT will serve as an authorized reseller, bringing satellite internet to enterprise customers throughout the region, specifically corporations and small-to-mid-sized businesses. Powered by a constellation of thousands of satellites, Amazon Leo is Amazon's low Earth orbit satellite network, designed to provide fast, reliable satellite internet connectivity to customers beyond the reach of traditional networks.

The agreement brings Amazon's next-generation satellite technology into IBSAT's satellite technology portfolio, enabling reliable connectivity for demanding enterprise use cases. This includes companies operating in remote locations across the region.

"This is an amazing new business opportunity for our customers and over 80 ISPs and agents within the IBSAT ecosystem," said Javier Gómez, CEO of IBSAT. "Amazon Leo will enable us and our partners to be part of this new but rapidly growing business in Spain and Portugal, under a well-established and solid model with IBSAT, leveraging Amazon Leo's satellite network."

Customers will connect to the Amazon Leo network using Amazon Leo antennas. Amazon Leo Ultra is the most powerful antenna in the line, capable of delivering download speeds of up to 1 Gbps and upload speeds of up to 400 Mbps—capacity that supports demanding enterprise applications.

Serving key industries across Spain and Portugal, IBSAT will offer Amazon Leo as part of its portfolio of solutions and services, tailored to the sectors it has served across the region, including industrial, energy, retail, hospitality, education, agriculture, transportation and other market verticals among others.

"IBSAT and our partners are really excited about this opportunity to bring Amazon Leo to customers in with the vision of keeping enterprises connected," added Gómez. "From large corporations to micro-businesses, Amazon Leo will deliver reliable, secure connectivity — and IBSAT is proud to partner in making this a reality."
